Hi Jeremy,

Our email program strips files with a '.zip' extension. Could you rename it with a '.zzz' file extension? That usually works. Sorry for the complication and thanks for the quick response. We are working on a response letter to the Cleco letter.

Thanks,

Erik

**Subject:** FW: Cleco Screening Model Results - EPA Region 6 Request for Additional Information

Erik,

Per the request below, attached is a .ZIP file of all three years of CALPUFF, CALPOST, and POSTUTIL input and output files.

There are a few things you'll notice immediately, most of which are addressed in a letter that Cleco sent to Guy Donaldson yesterday. For example, the CALPUFF and POSTUTIL versions in these first runs do not match what is called for in your most recent guidance letter. Unfortunately we had completed the first modeling before we received that letter, and at that time we were going on the assumption that we should do everything exactly the same way as was recently done in Arkansas. We are in the process of making the necessary changes now.

As always, don't hesitate to call if you have any questions or need any additional information.

Thanks,

---

**Importance:** High

Jeremy,

I received the request below yesterday afternoon from Vivian at LDEQ. Can you folks provide Erik at Region 6 with the information requested?

Thanks,

Bill

**Importance:** High

Hi Bill,

We have had a request from EPA to have you submit the modeling files. Erik said it would help them to make sure you guys were using all of the proper inputs before doing the refined modeling. I would have contacted Jeremy myself, but I felt better going through you to get the data.

Hope you are having a good week.

**Subject:** Cleco Screening Model Results

Hello Vivian,

Attached are the Calpuff screening results for the applicable Brame Energy Center sources (Units 1 and 2; i.e., Nesbitt I and Rodemacher II).

One thing to point out is that Nesbitt was burning oil some times during the 2001-2003 time period. So that increased the SO<sub>2</sub> from that unit for input into the screening model. I don't

recall that unit burning oil since I became employed in January 2009. There will be no oil burning in the Nesbitt I unit in the future due to MATS.

If there are questions, please get back to me.

Thanks,

Bill
